Jim,

The 4th quarter water monitoring data for Skyline Mine is in the Pipeline and ready to be uploaded to the Database. To our knowledge, the only missing data are the following; Tritium/Carbon14/Deuterium etc. samples (these will be added as soon as the lab analysis is received). I also noticed that the new well site in Winter Quarters Canyon is mislabeled; it is currently 8-5-1 and should be 08-1-5.

Let me know if you have any questions,
